Housing Policies

Adherence to the housing services policies is vital to a safe, fair, and enjoyable residential experience. Violation of these policies or those in the housing license agreement may result in administrative or disciplinary actions, which could include removal from university housing. Design professionals or UF project managers should submit and receive approval of such variances before incorporating changes into the design documents or proceeding with work that varies from these standards. The university recognizes that its design and construction consultants are often more aware of industry standards and emerging trends. The facilities amp capital planning department's office of university planning amp development is responsible for the university design standard manual. The university's design standards manual was prepared for architectural and engineering consultants, contractors, and university staff involved in the design, new construction, and renovation of university facilities systems. The exterior design standards for existing buildings were developed by the office of the campus architect, OCA, under the direction of the vice chancellor for administrative services in the effort to maintain the original character and design intent of University of Illinois at Chicago buildings. All design consultants and contractors are expected to fully review these standards as part of their services to Brown University at each specific applicable stage of the project.

SD DD CD Submittal Change Request Other Please Print and Complete the Compliance Form

The four-bedroom module design dorms 4 airmen developed for E1-E4 unaccompanied housing is based upon increased and enhanced Air Force criteria. Detailed analysis of square footage requirements and constraints and prototype development conceptual module plans are provided in.

Universal design is a revolutionary but practical leap forward in the evolution of building and design procedures when designers and manufacturers seize this concept. Universal design will become common, convenient, and portable.

Section 00 Contents
Section 0 Preface

These baseline design standards for student housing are provided as a resource for design and construction professionals and staff at the various institutions of the University System of Georgia (USG) who are engaged in the design and planning of new student housing. These guidelines represent the collective experience of the USG and its institutions. McGill's standards are intended as a general rule for most circumstances and to provide direction to the design professionals. The purpose of these standards is to assure maximum quality and value in construction projects at McGill University through uniformity, system or component quality, compatibility, functionality, and ease of maintenance.
