000 grant from the US Department of Energy Nuclear Energy University Programs including assistant professor Bora Gencturk, Hugh Roy and Lillie Cranz Cullen Distinguished Professor Kaspar Willam Jamie Padgett of Rice University and Rizwan Uddin of University of Illinois Urbana-Champaign. This project aims, Bora Gencturk, Assistant Professor of Civil and Environmental Engineering, recently won a two-year 175,000 bridge award from the National Science Foundation University of Houston Department of Civil and Environmental Engineering. While concrete and steel remain the backbones of modern infrastructure civil, a team of researchers from University of Houston Cullen College of Engineering and Qatar University has won a 779,000 grant to develop a new way to rehabilitate deteriorating reinforced concrete structures. The three-year grant from the Qatar National Research Fund goes to a team led on the Houston end by Civil and Environmental Engineering Assistant Professor Mina Dawood. Currently, there is over 74,000 metric tons of used nuclear fuel stored in the US, this corresponds to more than 260,000 UNF assemblies out of which approximately 91,000 are stored in over, new stronger concrete that can better withstand an earthquake is not much good if it's too expensive to use. That's the idea behind a research project being conducted by Bora Gencturk, Bora Gencturk, Assistant Professor of Civil and Environmental Engineering, Department of Civil Engineering Program, Mina Dawood, Bora Gencturk, Craig I Glennie, Hyongki Lee, Mo Li, Kalyana Bnakshatrala, Deborah F Rodrigues, Kyle B Strom, University of Houston, Houston TX 77204 713 743 2255, Graduate Faculty Cullen College of Engineering University of Houston. P E Structural Health Monitoring Smart Sensors Structural Performance and Durability in Natural Disasters Constitutive Modeling of Reinforced and Prestressed Concrete Structures. Bora Gencturk, Assistant Professor of Civil and Environmental Engineering, Department of Civil Engineering Program, Mina Dawood, University of Illinois at Urbana-Champaign, Dr. Bora Gencturk received two grants—one from the National Science Foundation for Bridge Damage Evaluation and life cycle assessment of reinforced HPFRC beam-column joints under multiaxial loading and the other from the University of Houston for CASK mis loads evaluation techniques, Cive 7340 Earthquake Engineering Fall 2011. Bora Gencturk page 2 of 3 Computer programs, Some homework assignments, and the second project require the aseismic roof isolation system built with steel oval elements, Abdeldejelil Belarbi, University of Houston, Hamidreza Tahsiri, and Mina M R Dawood, University of Houston. Bora Gencturk, University of Southern California. This international symposium, Dr. Bora Gencturk is an Assistant Professor in the Sonny Astani Civil and Environmental Engineering Department at the University of Southern California. USC he obtained his Ph D and M S degrees from the University of Illinois at Urbana-Champaign and his B S degree from Bogazici University, Istanbul, Turkey. Join LinkedIn Summary: Mina Dawood has been a faculty member at the University of Houston since 2009. His primary research interests include assessment and evaluation of the remaining capacity, Farshid Hosseini currently works at the Department of Civil and Environmental Engineering University of Southern California.
