Chiller Wikipedia
April 16th, 2019 - A chiller is a machine that removes heat from a liquid via a vapor compression or absorption refrigeration cycle. This liquid can then be circulated through a heat exchanger to cool equipment or another process stream such as air or process water. As a necessary by product, refrigeration creates waste heat that must be exhausted to ambience or for greater efficiency recovered for heating.

Global HVAC Safety Devices Market 2019 Analysis Forecast
April 18th, 2019 - This will allow the readers to analyze manufacturing cost analysis, marketing channel, distributors, and customers market dynamics of HVAC Safety Devices market. HVAC Safety Devices report target market product specifications, current competitive players in HVAC Safety Devices market, and the market revenue with profitability.
