The California Psychological Inventory (CPI) assessments are powerful tools for helping individuals improve their performance using a sophisticated technique to extract detailed personality insights. They summarize and explain how other people see a person and judge his or her leadership style. The exceptional history validity and reliability of the California Psychological Inventory (CPI) assessment make it one of the most respected assessments in the world.

The CPI is a self-report questionnaire designed to measure normal range human behavior. It consists of 434 true false items representing concepts such as tolerance, responsibility, integrity, empathy, and self-control that are commonly used to assess personality. The 260 questions on this test are a subset from the 434 questions on the famous California Psychological Inventory (CPI) which is why the name is now CPI 260. This test has been in use for over 50 years. Click here to read a sample report. Click here to see the client list from DiscoverYourPersonality.com.

Do you have management potential? The BPS qualifications in test use to
ensure that professionals using tests are appropriately qualified. The BPS has developed qualification standards defining the knowledge and skills that should be held by anybody using a psychological test, originally developed in 1957 by Harrison Gough. The California Psychological Inventory (CPI) is a leading non-clinical personality inventory test that evaluates interpersonal behavior and social interaction of normal individuals. The standard 434-question test is administered in 45 to 60 minutes in true-false format and is similar in design to the MMPI. Scales Vi and V2 can be said to describe four types of psychological organization of personality: Alpha, Beta, Gamma, and Delta. Scale V3 is used to determine the degree to which the positive potential for a particular personality type has been developed; development occurs along a scale from 1 (lowest) to 7 (highest). The test name is California Psychological Inventory (CPI) and the publisher is Johnson Roberts and Associates Inc. Business Address: 6664 Colton Blvd, Oakland CA 94611. Questionnaire submitted by Mike Roberts, PhD, ABPP, email: lepsinc@yahoo.com, phone: 408-356-9696, ext. 53. Testing instructions follow these instructions to complete the California Psychological Inventory (CPI): The test will open in a new window so you may alternate between these instructions and the test, or you may print a copy of this page. Allow approximately one hour to complete the test. Personality tests as per PSI assess aspects of a person's character, behavior, thoughts, feelings, and make us California Psychological Inventory (CPI) measures social skills, intellectual flexibility, and interests. Under certain conditions, 53 true-false questions sample question: My home life was always happy (true/false). The Personality Assessment Inventory (PAI) is a self-report objective inventory of adult personality and psychopathology. First published in 1990, it consists of 344 test items that make up 22 full scales with no item overlap between scales. 4 validity scales, the CPI is the personality test most often used to select public safety officers in the USA. The Junior and Adult Police and Public Safety Selection Report supplements the basic CPI with features designed specifically for selecting public safety officers. The California Psychological Inventory (CPI) is easily the largest exam on this list; the long version contains 434 questions designed to assess your personality on 29 scales including sociability, self-control, and independence. The California Psychological Inventory (CPI) assessments built on 50 plus years of exceptional history. Validity and reliability are powerful leadership development and selection tools that help people and teams improve their performance. The narrative report includes all 100 California Q Sort items from the
