The University of Zimbabwe has announced its second list of accepted students for the 2013 academic year. The list includes students from various disciplines and nationalities. The university is committed to providing quality education and training programs that focus on rural and regional development. The college of agricultural science and technology, in particular, is noted for its interdisciplinary teaching and learning approach, which integrates community engagement and research. 

The university of Zimbabwe online portal is designed for formal and prospective students to perform various academic actions, such as online course registration, fees payment, result check, admission list status, inter-faculty clearance, and academic tracking. The basic requirement for pharmacists to be considered for registration is an undergraduate or postgraduate pharmacy degree from a recognized university. In many countries, this involves a four or five-year course to attain a master of pharmacy degree (MPharm). Students graduating after January 1, 2003, must complete a doctor of pharmacy degree to become a pharmacist.
