Business Analysis and Valuation Text Only, Second Edition, Krishna Palepu, Erik Peek, and Paul Healy, 9781408021163. Please email us with your chapter 1, a framework for business analysis and valuation using financial statements. Chapter 1 quiz: Which of the following statements is true: I. Private firms’ financial statements are strongly influenced by tax rules, and II. Managers of private firms have less incentive to prepare informative financial statements than managers. Financial statement analysis and valuation is intended for use in a financial statement analysis and or valuation course in which profitability analysis and security valuation are emphasized. This book accommodates minicourses lasting only a few days as well as extended courses lasting a full semester. It is accompanied by business analysis and valuation software model published by the Harvard Business School Publishing Company.

Business valuation is a process and a set of procedures used to estimate the economic value of an owner’s interest in a business. Business valuation is used by financial market participants to determine the price they are willing to pay or receive to effect a sale of a business. In addition to estimating the selling price of a business, the same valuation tools are often used by business appraisers to develop a business analysis and valuation using financial statements. Text and Cases is a textbook by Krishna Palepu and Paul Healy which is widely used in worldwide MBA programs and finance courses. It is in its 5th edition and also has an IFRS edition. The fifth edition was released August 2012.

Business Analysis and Valuation using Financial Statements, Text and Cases, 4e has a valuation emphasis and focuses on a four part framework: Business strategy analysis: Adjusting accounting, business analysis and valuation. IFRS edition richly informs on contemporary
