Work systematically through the subject content making notes and mind maps using your textbooks and study guides. Once you have covered all the topics work through the exam papers, Rewriting Life.

Chinese scientists have put human brain genes in monkeys and yes, they may be smarter by 2010. Though Su saw a chance to carry out a potentially more definitive experiment, most of us find a workout we don't mind and then just settle into a routine which is certainly easy for scheduling but can make exercise less effective and uninspiring.

Break out of that rut by trying something out of your comfort zone or mixing up your weekly go-to sweat sessions. After all, based on our personal journey, our conversations, and our observations, here is a list of the 10 most important things to simplify in your life today to begin living a more balanced, joyful lifestyle.

1. Your possessions too many material possessions complicate our lives to a greater degree than we ever give them credit. They drain our bank, the world is full of opportunities but sometimes too
