1 Introduction

2 China's livestock production

3 China's feed production

4 Policies enhancing development of livestock and feed industries

5 Consumption and trade of livestock products

6 What natural resource problems are associated with manure management?

Most confined livestock are fed a ration primarily produced offsite. In other words, the feed is brought to the confined animal enterprise. The animal product—whether meat, milk, or eggs—is removed and the manure remains. USDAs staff and not necessarily statements of official US government policy.
