developed by w huit last updated november 2018, researchers from university
of california at los angeles ucla and colleagues have designed a new device
that creates electricity from falling snow the first of its kind this device
is inexpensive small thin and flexible like a sheet of plastic the device can
work in remote areas because it provides its own power and does not need
batteries said senior author richard kaner who holds ucla, graduate
opportunities titles marked ms are for students seeking a master’s degree phd
are for students seeking a doctoral degree not marked are open to students
seeking either master’s or doctoral degrees100 Great STEM Camps for Kids Data
