A Eurocopter single engine serial Ecureuil Astar AS350 B3 lands on the top of the world on May 14, 2005 at 7h08 local time. A serial Ecureuil Astar AS350 B3 piloted by the Eurocopter X test pilot Didier Delsalle landed at 8850 meters (29,035 ft) on the top of Mount Everest, Kingdom of Nepal. The multipurpose single engine AS350 B2 powered by a 732 shp (546 kW) Turbomeca Arriel 1D1 engine has an outstanding proven track record. Its flexibility and low acquisition cost have made it a very sought-after helicopter capable of performing a wide range of missions including passenger transportation, aerial work, training, observation, fire fighting, and law enforcement, among others. Design and development began in the early 1970s to replace the Alouette II, and the first flight took place on June 27, 1974. A twin-engined version known as the Ecureuil 2 Twin Squirrel or in North America as the TwinStar first flew on September 28, 1979. Despite the introduction of the Eurocopter EC130 in 2001, production of both the AS350 and AS355, and of their AS550 and, the Airbus Helicopters formerly Eurocopter AS355 Ecureuil 2 Twin Squirrel is a twin engine light helicopter originally manufactured by Aérospatiale in France, later part of Eurocopter Group, now Airbus Helicopters. The AS355 is marketed in North America as the TwinStar. Design and development at Aérospatiale began in the early 1970s to replace the Aérospatiale Alouette II, the Eurocopter AS350 Cureuil Squirrel is a single engine light helicopter originally designed and manufactured in France by Aérospatiale. Now Airbus Helicopters in North America the AS350 is marketed as the Astar. The AS355 Ecureuil 2 is a twin engine variant marketed in North America as the TwinStar. The Eurocopter EC130 is a derivative of the AS350 airframe and is considered to be...
