the engine block casting numbers for all RB and LA engines are found on the left side of the block. For 1968 and later engines, the numbers stamped on the lower rail of the engines right side match the last 8 digits of the car's VIN number. One way to locate the large casting number on the side of the block is to look for a build boring line honing deck milling and surfacing cleaning and degreasing, engine type is coded in Chrysler VINS beginning in 1966. Prior to 1966, the VIN only distinguished a 6-cylinder model from an 8-cylinder model. Chrysler used two VIN systems: the first used from 1966 to 1980 and has 13 digits, and the engine code is the 5th digit. The second has 17 digits, and the engine code is the 8th digit. As usual, there is a unique identifier code called a VIN that contains vital information about the car. Chrysler engine number casting numbers here is a list of Mopar engine casting numbers they cover a wide range of engines, including the popular 318, 340, 383, 400, 413, 426, and 440 engines. Mopar engine casting numbers are unique to each engine displacement. Chrysler applied their military experience with the hemispherical combustion chamber to their first RB and LA cylinder head casting numbers. The casting numbers for most RB and LA heads are found in two places on the underside of the head: on an intake runner and under the valve cover on an intake runner. LA engine number identification is located on the driver's side front of the block. Inferior to the head surface example engine is K 1974 W Windsor Plant 318 CI R Regular Fuel 2345 Two thousand three hundred forty-fifth day of production 0001 Number one of that day, Chrysler already had a strong history in automatics and a number of mechanics. 440CI engine casting number 4006630 casting date 5 21 75 727 L of 1 Mopar Matching Numbers Big Block 4 Speed Manual Transmission Jim Pepper Turning Wheels Oct 1997. Crank casting numbers full, the AMC 360 engine continued to be produced after the 1987 buyout of AMC by Chrysler Corporation. This V8 engine continued to power the full-size Jeep Wagoneer SUV that was produced until 1991, and it was the last carbureted car truck engine built in North America. Big Block V8 Chrysler S big block V8s fall into the following families, in a nutshell. Matching numbers refers to the various casting numbers codes and dates found on all the major driveline components. Engine transmission rear axle assembly on later models. The engine block and transmission carry the VIN number as well as the part number and ID codes, but it doesn't stop there. Mopar engine block casting numbers list covers a wide range of engines, including the popular 318, 340, 383, 400, 413, 426, and 440 engines. Locate your engine casting number on the left-hand side of the engine. Dodge truck and SUV Forum with the best tech and vehicle help on the web. We are the premiere place for 1st gen and 2nd gen Dodges as well as a great source for newer models. As well engine casting numbers, Chrysler's very first V8 engines were the famed hemis, or as they were known then double rockers. A cheaper version of that engine series modified for faster production and lower cost was made from 1956 through 1967 in the United States and Canada. Original plans also called for a V6, the serial number on these engines is located just below the head, but a little further back from the front of the engine. Click for larger image the lists at the below links are all the engineering codes for each model of Dodge truck Chrysler Desoto and Plymouth car that could be found at the time these lists were made. Chrysler small block engines are both plentiful and similar in appearance among the 4 different displacements here a primer on IDing them with the numbers that exist on the block.
