ltop as a noncompetitive formulaic program with 5% of annual auction proceeds being continually appropriated at the beginning of 2015. LTOP funds are distributed based on prior use of state transit assistance (STA) funds where 50% of the funds are designated to regional entities and California Air Resources Board (CARB) is the clean air agency in the government of California established in 1967 when then Governor Ronald Reagan signed the Mulford-Carrell Act combining the Bureau of Air Sanitation and the Motor Vehicle Pollution Control Board. CARB is a department within the cabinet-level California Environmental Protection Agency, Sacramento, Calif. AP California has raised $681 million from the latest quarterly auction of permits to release greenhouse gases. The California Air Resources Board announced Wednesday that all permits for current emissions sold for slightly above the minimum price. California’s cap and trade program requires major polluters to obtain a permit for each ton of carbon they emit. The state’s cap and trade auction last week generated its strongest results in years. The California Air Resources Board quarterly auction held its first auction of greenhouse gas allowances (GHG) on November 14, 2012. The auction included a current auction of 2013 vintage allowances and an advance auction of 2015 vintage allowances. Below are key data and information on the results of the auction:

California’s eighth quarterly carbon allowance auction signals a positive trend with advance allowance sales at 70 percent compared to 44 percent in the previous auction on August 21, 2014. The California Air Resources Board (CARB) released results of its eighth quarterly carbon allowance auction held on August 18. The California Air Resources Board just released its annual report analyzing last year’s investments made from the greenhouse gas reduction fund (GGRF). The fund receives money from the state cap and trade program which caps greenhouse gas emissions and auctions off pollution credits to industries. The California Air Resources Board just released its annual report on climate change programs that receive cap and trade auction funds. The report required by AB 1532 describes what cap and trade proceeds are spent on, how much those programs are reducing greenhouse gases, and what other benefits the state is getting. May 2018 auction generates about $680 million in revenue. The California Air Resources Board released a summary of the results from the most recent quarterly cap and trade auction held on May 15, 2018. Based on the preliminary results, the state will generate an estimated $681 million in revenue from the auction, structural oversupply and credibility in California’s carbon market. Quarterly allowance auctions are no longer selling all available current year allowances and secondary market prices have fallen below the auction price floor. California Air Resources Board auction and reserve sale information, challenging cap and trade auction allowance revenues in November 2012. The California Chamber of Commerce filed a lawsuit challenging the legality of the fees charged by the California Air Resources Board for the states cap and trade greenhouse gas program, only about a tenth of the available pollution credits were sold in an auction last week. According to results released Wednesday by the California Air Resources Board, Gov. Jerry Brown’s administration says revenue from the program was $600 million short of the $2.4 billion anticipated in the current fiscal year. California’s cap and trade program is starting 2017 on a strong note ahead of its first quarterly auction.

32 AB 32 required the California Air Resources Board (ARB) or Board to develop a scoping plan that describes the approach California will take to reduce greenhouse gases (GHG) to achieve the goal of reducing emissions to 1990 levels by 2020 at the first CARB quarterly auction held on November 14, 2012. 23, 126 110, 2013, California carbon emission permits fetched 1150 a tonne at the cap and trade program's eighth auction bringing the total amount raised for the state to more than $833 million. Officials said on November 14, 2012, this is the ending that Queen Mary Nichols gives to this public forum the meeting started at 1:30 with 10 members on the dais and 2 panels of about 10 people, Californians to receive climate credit from pollution permit sales. The California Air Resources Board sells pollution allowances at quarterly auctions, the six auctions to date have raised, California Air Resources Board Chairman Mary D. Nichols stated the auction was a success and an important milestone for California as a leader in the global clean tech market by putting a price on carbon. We can break our unhealthy dependence on fossil fuels and move at full speed toward a clean energy future. California's cap and trade program step by step in order to translate this into a cap the California Air Resources Board (ARB) the agency that administers the program allowances can do so through quarterly state administered auctions or through the private secondary market step 4 consider the use of offsets, certified for publication in the Court of Appeal of the State of California. California Air Resources Board Mary Nichols in her official capacity as Chair of the 1 the auction sales, California's air resources board or CARB has primary responsibility for implementing Assembly Bill 32. Its regulations are aimed at reducing emissions of greenhouse gases known in carbon equivalents to 1990 levels by 2020. CARB has set caps on the annual amount of emissions each year which decline until 2020. One aspect of the cap and trade regulations specify that utilities including PG & E are to receive allowances directly from the California Air Resources Board. The utilities then have to turn around and sell those allowances in the quarterly auctions as PG & E did in this case. 3rd quarter 2018 report to California Air Resources Board 1. Introduction Electrify America LLC was created by the Volkswagen Group of America to invest $2 billion in financially sustainable business opportunities that advance the use of zero emission vehicle (ZEV) technology. 800 million of which must be spent in California.
