**M2 Browning Wikipedia**

September 12th, 2020 - The M2 machine gun or Browning 50 caliber machine gun is a heavy machine gun designed toward the end of World War I by John Browning. Its design is similar to Browning's earlier M1919 Browning machine gun which was chambered for the 30-06 cartridge. The M2 uses the much larger and much more powerful 50 BMG cartridge which was developed alongside and takes its name from the gun itself BMG.

Specially developed composites materials has been developed over a period of 6 years to create a ammunition case weighting 1.3 of the steel version. The LWAC weighs 770 grams.

M101 howitzer Wikipedia
September 14th, 2020 - The 105 mm M101A1 howitzer previously designated M2A1 is an artillery piece developed and used by the United States. It was the standard U.S. light field howitzer in World War II and saw action in both the European and Pacific theaters. Entering production in 1941 it quickly gained a reputation for accuracy and a powerful punch.

The Upgraded M2A2 Ammo Cans Are Now Available
September 11th, 2020 - The M2A1 ammo cans do not have this bracket which forces the rubber seal in the lid of the ammo can to support any weight on top of the can leading to seal failure. This is not an issue if you are storing your ammo cans inside the original wire bound wood ammo crate since the crates are load bearing and designed to prevent seal distortion on.
